

Have GPS Will Travel

The Ultimate GPS Hands-On Workshop for Educators!

Experience the ultimate GPS hands-on workshop for educators. This class is a hands-on introductory level class to GPS units. This class is for all 3–16 formal and non-formal educators who wish to learn what GPS is and how to use it as a tool with their students in the classroom.

Teachers will learn how these devices function, and why they are important in the educational environment. Teachers will also have the chance to try out different types of GPS units.

The **unique twist** to this class will be the use of ecocache sites that let you experience history, social studies and geography in action – its landscapes, its formations, its development or the visible features that all have a story to tell. Visitors to the local ecocaches will be able to see how our history has been shaped by historical processes, how the museum manages the resources and how to learn about the local history and geography.
