

TORSTENSON YOUTH CONSERVATION EDUCATION CENTER
IN PARTNERSHIP WITH THE LTC2 AND KIDS **PRESENTS:**

Have GPS Will Travel

*The Ultimate GPS Hands-On Workshop
for Formal & Non-Formal Educators!*

Experience the ultimate GPS hands-on workshop for educators. This class is a hands-on introductory level class to GPS units. This class is for all 3–16 formal and non-formal educators who wish to learn what GPS is and how to use it as a tool with their students in the classroom.

Educators will learn how these devices function, and why they are important in the educational environment. Educators will also learn how to tie in their GPS data to Google Earth. Educators will have the chance to try out different types of GPS units.

Educators will learn about geocache sites that let you experience history, social studies, science, mathematics and geography in action - its landscapes, its formations, its development or the visible features that all have a story to tell.

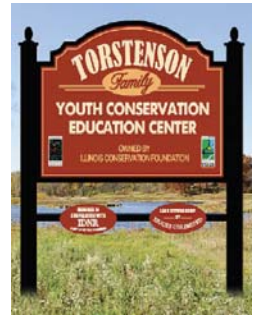

Creating local geocaches will give a location in your area a voice as well as making your mark on the world for your community!
